3 of 4 people found the following review helpful:

★★★★★ Heads Up on the New Commodity Markets, December 7, 2001

Reviewer: **susan pollack** from Houston, Texas

This book is the first that I have seen tackling the newer commodity markets of weather, emissions, bandwidth and coal trading. It is easy to read and quite informative. Peter Fusaro has assembled the leading practitioners from the global energy trading community to offer their insights into these emerging markets. Moreover, software solutions, European gas trading, electronic energy trading and index construction are explained simply and clearly for the laymen. It's a must buy if you want to get up to speed fast in these rapidly changing markets which are now more important than ever due to the Enron financial meltdown.
